Education

Ongoing - final stage
Bachelor of Computer Science
Faculty of Sciences,
University of Lisbon

2025 - 2025
Full Stack Bootcamp
Code For All_

1998 - 2004
Master Degree Architecture
Lusíada University of Lisbon

Stack

Java	Jira
JavaScript	Azure
Python	Jenkins
Haskell	TFS
C	SQL / MySql
Assembly	SOQL
Git	PostgreSql
HTML	Hibernate
CSS	Ant/Maven
Apex	Spring
Scrum	Agile
AWS	Prompt Engineering
Postman	Swagger API
BootStrap	RAG

Language

Portuguese - Native	Spanish - B1
English - C1	French - A2

Full Stack Developer

Full Stack Developer with a background in Architecture who loves building things — from web apps to small games.

I've built on my design and creative skills with a solid technical foundation from my studies in Computer Engineering at Faculty of Sciences, University of Lisbon, where I gained hands-on experience with programming, data structures, software systems, and graphics.

Recently I focused on Full Stack Web Development through the Code for All Bootcamp, working with Java, Spring, PostgreSql, JavaScript, where I discovered a real passion for game development, blending logic, design, and storytelling into interactive experiences.

I enjoy learning new tools, experimenting with ideas, and turning concepts into working software — always chasing that feeling when something you've built finally comes to life.

Experience

March 2025 - Outlier AI
Training and evaluating AI models

Worked as an AI Trainer and Evaluator, assessing large language model outputs for accuracy, coherence, tone, and linguistic quality.
Identified inconsistencies, edge cases, and ambiguous responses, contributing to improved dataset quality.
Applied analytical thinking and attention to detail to ensure training data met strict quality standards.

Tech Stack:
LLMs (evaluation), Prompt Engineering, NLP concepts, Data Quality Validation, AI Annotation Tools, Technical Writing

December 2022 - November 2024 - Unipartner
Java Software Developer/Analyst

Administered and developed on the Liferay platform, ensuring smooth operation and system optimization.
Acted as Java Analyst in the migration of legacy systems from Liferay to OutSystems, collaborating with cross-functional teams to define technical solutions.
Tested and validated all web services (both new and legacy), reviewing logs and ensuring the OutSystems teams correctly populated and used the required data.
Applied problem-solving and technical design skills to deliver scalable and maintainable solutions.
Contributed to both backend and frontend development, strengthening expertise in Java based enterprise applications.

Tech Stack:
Java · JSP · JavaScript · HTML · CSS · RESTful & SOAP Web Services · SQL · TSF · Jenkins · JBoss · Azure · Agile · Apache Ant

April 2022 - December 2022 - Unipartner
Salesforce Developer

Developed and maintained Salesforce solutions, implementing Lightning Web Components for frontend functionality.
Participated in backend development and system integration to enhance CRM workflows.
Collaborated with stakeholders to understand requirements and translate them into technical solutions.
Strengthened skills in Salesforce platform, Apex, and full-stack development.

Tech Stack:
Salesforce CRM · Apex · Lightning Web Components (LWC) · JavaScript · HTML · CSS · SOQL · TFS · Visual Studio Code · RESTful & SOAP Web Services · Azure · Agile
