**Address**
Amadora
Portugal

## Education

*Ongoing - final stage*
**Bachelor of Computer Science**
Faculty of Sciences,
University of Lisbon

2025 - 2025
**Full Stack Bootcamp**
Code For All_

1998 - 2004
**Master Degree Architecture**
Lusíada University of Lisbon

## Language

**Portuguese - Native**

**English - C1**

**Spanish - B1**

**French - A2**

# Full Stack Developer

Full Stack Developer with a background in Architecture who loves building things — from web apps to small games.

I've built on my design and creative skills with a solid technical foundation from my studies in Computer Engineering at Faculty of Sciences, University of Lisbon, where I gained hands-on experience with programming, data structures, software systems, and graphics.

Recently I focused on Full Stack Web Development through the Code for All Bootcamp, working with Java, Spring, PostgreSql, JavaScript, where I discovered a real passion for game development, blending logic, design, and storytelling into interactive experiences.

I enjoy learning new tools, experimenting with ideas, and turning concepts into working software — always chasing that feeling when something you've built finally comes to life.

## Experience

**April 2026 - Present**
**Code for All_ (Outsourced at Lusitânia Vida) | Lisbon (Hybrid)**

Currently driving technical excellence in the insurance sector through the development, maintenance, and modernization of core systems at Lusitânia Vida.

Key Responsibilities:

DevOps Initiative amp; Research: Spearheading the research, feasibility studies, and architectural planning for the upcoming implementation of Azure DevOps within the companys infrastructure.

Version Control Planning: Designing the transition strategy to Git for version control, including the definition of future branching models and repository structures.

CI/CD Pipeline Design: Spearheading the initial design and testing of automated CI/CD pipelines to optimize future build, test, and deployment workflows.

Database amp; Application Development: Designing and implementing robust database solutions using PL/SQL and Oracle SQL for life and non-life insurance portfolios.

Web Applications amp; Reporting: Developing responsive web applications via Oracle APEX and generating complex business reports with Oracle Reports.

Legacy System Maintenance: Maintaining and debugging legacy COBOL programs while aligning current workflows with modern development practices.

Tech Stack:
COBOL, MobaXTerm, Oracle SQL, PL/SQL, Oracle APEX, Oracle Reports, Oracle SQL Developer, Azure DevOps, Git.

**March 2025 - Outlier AI**
**Training and evaluating AI models | Remote**

Worked as an AI Trainer and Evaluator, assessing large language model outputs for accuracy, coherence, tone, and linguistic quality.

Identified inconsistencies, edge cases, and ambiguous responses, contributing to improved dataset quality.

Applied analytical thinking and attention to detail to ensure training data met strict quality standards.

Tech Stack:
LLMs (evaluation), Prompt Engineering, NLP concepts, Data Quality Validation, AI Annotation Tools, Technical Writing.

## Stack

Java
JavaScript
Python
Haskell
C
Assembly
Git
HTML
CSS
Apex
Scrum
AWS
Postman
BootStrap
Jira
Azure
Jenkins
TFS
SQL
MySql
SOQL
PLSQL
Oracle APEX
Oracle Reports
Oracle SQL Developer
MobaXterm
COBOL
PostgreSql
Hibernate
Ant/Maven
Spring
Agile
Prompt Engineering
Swagger API
RAG
Azure DevOps
Salesforce
VS Studio
Eclipse
Pycharm
IntelliJ

### December 2022 - November 2024 - Unipartner
**Java Software Developer/Analyst | Lisbon ( Hybrid)**

Administered and developed on the Liferay platform, ensuring smooth operation and system optimization.

Acted as Java Analyst in the migration of legacy systems from Liferay to OutSystems, collaborating with cross-functional teams to define technical solutions.

Tested and validated all web services (both new and legacy), reviewing logs and ensuring the OutSystems teams correctly populated and used the required data.

Applied problem-solving and technical design skills to deliver scalable and maintainable solutions.

Contributed to both backend and frontend development, strengthening expertise in Java based enterprise applications.

Tech Stack:
Java · JSP · JavaScript · HTML · CSS · RESTful & SOAP Web Services · SQL · TSF · Jenkins · JBoss · Azure · Agile · Apache Ant.
